Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by the submitted prior art Becker et al. (USPN: 5,878,223).

Regarding claims 1-7, Becker discloses determining a group of references (links) to resources (page) from a given first resource (current page) (Figures 5A, 5B, 6; C 9, entire, C 10, entire - when establishing the prediction table, a group of references to resources from a given resource are determined); for each reference to a resource in the group, computing a respective weight and assigning it to the reference (C 9, L 19-29; C 10, L 47-55); determining a reference from the group having a maximal respective weight (highest preference indication) and prefetching the resource referenced by that reference (C 2, L 37-62; C 4, L 54-67; C 5, entire; C 6, L 1-24), characterized in that the respective weight (highest weight value) for a reference is computed based on the number of times the resource referenced by that reference has been fetched previously (C 9, L 25-26; C 10, L 32-39; $P[B:A] = P[B:A] + c$), and on the number of times one or more further resources have been fetched previously from a server that serves the resource referenced by the reference (C 9, L 19-55 - the values in the same row are compared to determine the highest weight value).

Regarding claim 8, Becker discloses a worldwide web browser (Figure 1, Reference 12).

Regarding claim 9, Becker discloses a caching proxy server (Figure 1, Reference 130).

Response to Arguments

5. Applicant's arguments filed have been fully considered but they are not persuasive.

Regarding Applicant's argument, Becker discloses prefetching the resource referenced by that reference (C 2, L 37-62; C 4, L 54-67; C 5, entire; C 6, L 1-24), characterized in that the respective weight (highest weight value) for a reference is computed based on the number of

times the resource referenced by that reference has been fetched previously (C 9, L 25-26; C 10, L 32-39), and on the number of times one or more further resources have been fetched previously from a server that serves the resource referenced by the reference (C 9, L 19-55 – the values in the same row are compared to determine the highest weight value).

Regarding Applicant's argument concerning claims 3 and 6, refer to Becker - C 10, L 47-55.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
